

Natural Sciences
Year 6 of Primary Education:
ALL ABOARD!

Exercise 2

1. Why would you go and live somewhere else?

The following are some of the reasons people have migrated throughout history: environmental (floods, earthquakes, nuclear accident, etc.); social (wars, political persecution, religious beliefs, ethnic reasons, etc.); economic (unemployment, search for a better standard of living, etc).

2. What changes when you go and live somewhere else?

Different language; way of speaking; accent; food; way of dressing; climate; scenery; customs; timetables; festivals; music; games; the manner in which people interact.

3. When you first settle down in your new home, what new things can you teach the people living there?

People from other countries can teach us about their language or the different words they use; they can show us how to cook different dishes; they can show us their traditional dress and music; we can enjoy their games and stories; they can show us pictures of the scenery in their countries of origin, etc.
